DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 15-17, drawn to a method of a making hermetic plastic zipper.

Group II, claims 18-27, drawn to A hermetic plastic zipper including a pair of male and female hooks on the surfaces of the plastic films.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I has the special technical feature of the method of forming a zipper having engaging portions with a peelable plastic layer on the plastic zipper engaging portions, wherein an ultrasonic horn and anvil are held at a specific distance range for welding the peelable layer to the engaging portions. Group II has the special technical feature of a zipper having male and female hooks on the surfaces of the plastic films, wherein a readily peelable plastic layer is located and joins the tip portion of the male hook to the valley surface portion of the female hook. Group I does not require the special technical feature of the hooks on the zipper as defined in the Group II invention. Group II does not require the special technical feature found in Group I, i.e., the use of an ultrasonic horn and anvil held at a specific distance range for welding the peelable layer to the engaging portions.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
